Education

Shri Ram Institute of Science and Technology

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.67/10

Experience

Software Engineer | ADRS Techno Pvt. Ltd.

Apr. 2024 – Present

- Engineered and maintained backend services powering a multi-vendor marketplace platform, delivering product management, category management, cart, checkout, order processing, and invoicing workflows.
- Designed and implemented secure JWT-based authentication and role-based access control (RBAC) architecture supporting Admin, Vendor, and Customer operations.
- Developed scalable REST APIs consumed by web and mobile applications with structured validation and business rule enforcement.
- Integrated payment gateway services and automated invoice generation workflows, streamlining transaction processing and order lifecycle management.
- Optimized MySQL performance using indexing, query refactoring, joins, and stored procedures, improving application responsiveness.
- Managed Linux server deployments, production debugging, access control, release activities, and application maintenance.

Projects

Zopin – Hyperlocal Marketplace Platform

Pune | Jan 2026 – Present

- Architected and developed a production-grade hyperlocal marketplace connecting customers, shopkeepers, homepreneurs, and service providers through a unified digital platform.
- Designed and implemented 100+ REST APIs using Node.js, TypeScript, Express.js, PostgreSQL, and Prisma ORM.
- Integrated Cashfree Payment Gateway for subscription lifecycle management, webhook handling, renewals, plan upgrades, and refunds.
- Built an AI-powered assistant using Google Gemini for offer discovery, business search, coupon recommendations, and conversational interactions.
- Implemented Docker-based deployment workflows, CI/CD automation, and PostgreSQL schema migration strategies.

Client Magnet – CRM Platform

Hyderabad | July 2025 – Dec 2025

- Developed a customer relationship management platform to streamline sales operations and customer lifecycle management.
- Designed role-based workflows for Sales Representatives and Employees with controlled access to business functions.
- Implemented Java backend services and Oracle SQL integration for secure and efficient data management.
- Improved operational efficiency through centralized customer information and workflow automation.

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL, C++, Node.js

Backend: Spring Boot, Spring MVC, Hibernate, JPA, REST APIs, JWT Authentication

Frontend: React, HTML5, CSS3, Bootstrap, ionic

Databases: MySQL, PostgreSQL, Oracle SQL, MongoDB

DevOps & Tools: Linux, Docker, Git, GitHub Actions, CI/CD, Postman, Swagger

Achievements

- First Runner-Up in National Level Software Development Championship (Hackathon) organized by St. Aloysius College, Jabalpur.
- Participated in NETATHON2023 and developed solutions for an e-commerce business problem statement.

Certifications

- Azure Fundamentals (AZ-900)
